## Examples

A collection of usage examples of Mock Service Worker.

### JavaScript frameworks

- Angular (Jest, Cypress)
- Next.js
- React Native
- Remix (Playwright)
- SolidJS
- Svelte (Vitest, Playwright)
- Vue (Vitest, Cypress)

### Test frameworks

- Cypress
- Jest
- Jest (JSDOM)
- Karma
- Playwright
- Vitest / Vitest (CommonJS)

### Other tools

- Storybook

### Reading examples

Each example is a standalone repository featuring the usage of MSW with a certain framework or tool. Follow the instructions written in the [README.md](#) of respective examples to integrate MSW with those particular technologies. Some examples have separate instructions for client-side and server-side integrations. You can choose either or *both*, depending on where you wish to gain control over the network with MSW. **We highly recommend implementing both client-side and server-side interception** to guarantee seamless development and testing experience.

---

## Cloning examples

Each example can be forked immediately with CodeSandbox. To do so, click on the “Edit on CodeSandbox” button in the [README.md](#) of the respective example. This will load it in the cloud, allowing you to experiment with the integration and create reproduction cases easier.
