
Nebula (formerly Genome)

NOTE: These dots are intended for my setup. If you wish to use them (and feel free to take them and tinker around), you will have to make specific modifications for your own machine. I'll do my best to answer questions related to parameters that may need to be changed

Info

- OS: Arch
- WM: Qtile
- Terminal: Alacritty

- Colorscheme: Nord with extra dark color #242831

FAQ

How are you getting space around your qtile bar widgets?

Thanks to qtile-extras, I use the decoration widget to, well, add decorations to the bar's widgets.

Scrots
