
File Converter

Description

File Converter is a very simple tool which allows you to convert and compress one or several file(s) using the context menu of windows explorer.

You can download it here: file-converter.io.

You can find more information about what's in File converter and how to use it on the [wiki](#).

Donate

File Converter is a personal open source project started in 2014. I have put hundreds of hours adding, refining and tuning File Converter with the goal of making the conversion and compression of files an easy task for everyone.

You can help me by contributing to the project, by making a donation or just by saying thanks :).

Troubleshooting

If you encounter any problem with File Converter, you can:

- See the already known problems in the troubleshooting section of the documentation.
- Or report an issue on the bug tracker.

Setup development environment

Requirements

For File Converter and its explorer extension:

- Visual Studio 2022

For the installer:

- Wix 4
 - Community Visual Studio Extension
- Windows SDK Signing Tools for Desktop Apps

Thanks

Thanks to all the contributors of File Converter project.
