
Action Cable Examples

A collection of examples showcasing the capabilities of Action Cable.

Dependencies

You must have redis installed and running on the default port:6379 (or configure it in config/redis/cable.yml).

Installing Redis

On Linux

- `wget http://download.redis.io/redis-stable.tar.gz`
- `tar xvzf redis-stable.tar.gz`
- `cd redis-stable`
- `make`
- `make install`

On Mac

- `brew install redis`

Note: You must have Ruby 2.2.2 installed in order to use redis

Starting the servers

1. Run `./bin/setup`
2. Run `./bin/cable`
3. Open up a separate terminal and run: `./bin/rails server`
4. One more terminal to run redis server: `redis-server`
5. Visit `http://localhost:3000`

Live comments example

1. Open two browsers with separate cookie spaces (like a regular session and an incognito session).
2. Login as different people in each browser.

-
3. Go to the same message.
 4. Add comments in either browser and see them appear real-time on the counterpart screen.
