
Resume template

A simple Jekyll + GitHub Pages powered resume template.

Lisa M. Simpson

VP of Global Communications

This is the executive summary. You should write a few brief, concise, and meaningful sentences about yourself from a professional context, and your immediate career goals. Make the length appropriate for your needs, but keep it brief and concise

Contact me

Experience

Springfield International Human Rights Outreach

VP of Global Communications • Oct, 2013 – Present

Write about your core competencies in one or two sentences describing your position. If you held the position for a long time, it could be a longer section, including a couple bullet points

- A project you are proud of
- Another awesome project

Docs

Running locally

To test locally, run the following in your terminal:

1. Clone repo locally
2. `bundle install`
3. `bundle exec jekyll serve`
4. Open your browser to `localhost:4000`

Running locally with Docker

To test locally with docker, run the following in your terminal after installing docker into your system:

-
1. `docker image build -t resume-template .`
 2. `docker run --rm --name resume-template -v "$PWD":/home/app --network host resume-template`

Customizing

First you'll want to fork the repo to your own account. Then clone it locally and customize, or use the GitHub web editor to customize.

Options/configuration Most of the basic customization will take place in the `/_config.yml` file. Here is a list of customizations available via `/_config.yml`:

[...write these out...]

Editing content Most of the content configuration will take place in the `/_layouts/resume.html` file. Simply edit the markup there accordingly

Publishing to GitHub Pages for free

GitHub Pages will host this for free with your GitHub account. Just make sure you're using a `gh-pages` branch, and the site will automatically be available at `yourusername.github.io/resume-template` (you can rename the repo to `resume` for your own use if you want it to be available at `yourusername.github.io/resume`). You can also add a CNAME if you want it to be available at a custom domain...

Configuring with your own domain name

To setup your GH Pages site with a custom domain, follow the instructions on the GitHub Help site for that topic.

Themes

Right now `resume-template` only has one theme. More are coming :soon: though. :heart:

Roadmap

A feature roadmap is available here. If you features suggestions, please open a new issue.

Contributing

If you spot a bug, or want to improve the code, or even make the dummy content better, you can do the following:

1. Open an issue describing the bug or feature idea
2. Fork the project, make changes, and submit a pull request

License

The code and styles are licensed under the MIT license. See project license. Obviously you should not use the content of this demo repo in your own resume. :wink:
