
elementary tweaks

elementary tweaks is a system settings panel for elementary OS **Juno** that lets you easily and safely customise your desktop's appearance

Future releases and support for elementary OS **Odin** will be available here: [https://github.com/pantheon-tweaks/](https://github.com/pantheon-tweaks/pantheon-tweaks/)

Installation

```
1 sudo add-apt-repository ppa:philip.scott/elementary-tweaks
2 sudo apt install elementary-tweaks
```

If you have never added a PPA on Juno before, you might need to run this command first:

```
1 sudo apt install software-properties-common
```

How to build

```
1 sudo apt install libgconf2-dev libpolkit-gobject-1-dev libswitchboard
  -2.0-dev elementary-sdk
```

```
2 meson build --prefix=/usr
3 cd build
4 ninja
5
6 sudo ninja install
7 io.elementary.switchboard
```

Special Thanks

This repository is a fork of the original elementary-tweaks and could not have been done without the work of its authors Michael P. Starkweather, Michael “Versable” Langfermann, PerfectCarl, Marvin Beckers and additional contributors.
